

SIYABONGA NGCOBO

Enterprise & Cloud Data Engineer

South Africa | 069 550 8648 | [Email](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner and Data Engineer focused on enterprise and cloud data engineering. Currently contributing to Old Mutual's DHA Data Platform, supporting Raw and Bronze layer ingestion, schema improvements, metadata quality, batch processing, and analytics-ready data foundations. Skilled in Python, SQL, PySpark, Airflow DAGs, Matillion, AWS services, Azure DevOps, Jira, and modern data platform concepts including Apache Iceberg and Databricks fundamentals. Strong interest in building scalable, reliable data platforms that transform raw data into trusted business assets.

TECHNICAL SKILLS

Data Engineering: ETL/ELT pipelines, data ingestion, Raw layer, Bronze layer, batch processing, data transformation, data cleansing, schema validation, schema enforcement, metadata quality, pipeline monitoring

Cloud & Data Platforms: AWS, Amazon S3, AWS Lambda, Amazon Athena, DynamoDB, Apache Iceberg, cloud-native data platforms, Databricks fundamentals

Orchestration & Processing: Airflow, Airflow DAGs, PySpark, Apache Spark, Matillion ELT

Programming & Databases: Python, SQL, PostgreSQL, MySQL

DevOps & Delivery: Azure DevOps, Azure Pipelines, Git, pull requests, build pipelines, flake8, pre-commit, Jira

Tools & Collaboration: VS Code, Linux/Ubuntu, Docker, Grafana, Microsoft Teams, SharePoint

PROFESSIONAL EXPERIENCE

Old Mutual | Data Engineer

South Africa | Jul 2025 - Present

Contributing to enterprise data engineering initiatives within Old Mutual's Technology & Data environment, with a focus on the DHA Data Platform and analytics-ready data foundations.

- Support development of Raw and Bronze data layers for the DHA Data Platform, including ingestion workflows, schema handling, metadata improvements, and structured data preparation for downstream analytics and business use.
- Contribute to DHA Bronze ingestion workstreams covering Master, Request, Response, Hannis/HANIS, and NPR-related data flows.
- Support batch ingestion and schema-related work for HANIS data, including CSV schema setup, zipped batch file handling, schema enforcement, table configuration updates, and dynamic partitioning.
- Contribute to Airflow orchestration work, including Airflow DAG support for HANNIS/HANIS batch response processing and HANIS Batch Death delta processing.
- Support Azure DevOps delivery workflows through pull requests, build pipelines, repository changes, bootstrap scripts, flake8 checks, pre-commit validation, and code-quality fixes.
- Assist with data platform enhancements involving unique identifiers, source record keys, ingestion event IDs, and additional fields to improve traceability and support future deletion requirements across layers.
- Participate in technical discussions around Apache Iceberg adoption for Raw, Conform/Silver, and Gold layers, as well as batch and real-time architecture patterns involving Athena and DynamoDB.
- Collaborate with engineers, technical leads, data analysts, and stakeholders across recurring DHA Data Platform check-ins and delivery-focused technical sessions using AWS Data Platform environments, Airflow, Grafana, Azure DevOps, Jira, and Microsoft 365 tools.

Freelance Software & Data Engineer

Remote | 2023 - Present

- Build practical data pipelines, automation solutions, and Python scripts for small-scale business and learning use cases.
- Extract, transform, and process API-based data using Python and SQL-based workflows.
- Design SQL-based dashboards, automate repetitive data-handling tasks, and support lightweight data engineering solutions.

Master Maths/Science | Senior Tutor

Durban North & Westville | 2023

- Delivered tutoring sessions for Grades 10 to 12, simplified complex mathematical and science concepts, and supported structured lesson delivery.
- Mentored junior tutors while building communication, coaching, and problem-solving skills through learner support.

Master Maths/Science | Tutor

Cape Town | 2019 - 2021

- Conducted tutoring sessions, supported learners with mathematics and science concepts, and developed strong communication and explanation skills.

EDUCATION

WeThinkCode_ - Systems Development, NQF Level 5 | 2023 - 2024

North-West University - BSc Computer Science & Mathematics, First Year | 2022

CERTIFICATIONS & UPSKILLING

- AWS Certified Cloud Practitioner | 2025
- Databricks Data Engineering | Planned / Upskilling: building Databricks knowledge through self-study and online learning, with interest in the Databricks Certified Data Engineer Associate path.

DATA ENGINEERING TOOLKIT

- **Delivery & Tooling:** Azure DevOps, Jira, Grafana, Git, Docker, Linux/Ubuntu, VS Code
- **Lakehouse & Modern Data:** Apache Iceberg, Databricks Fundamentals
- **Orchestration & ELT:** Airflow, Airflow DAGs, Matillion ELT
- **Cloud & Data Platforms:** AWS, Amazon S3, AWS Lambda, Amazon Athena, DynamoDB
- **Programming & Data Processing:** Python, SQL, PySpark, Apache Spark
